SCOPE OF WORK

Job title: Empanelment of Application Security Audit and Vulnerability Assessment (VA) / Penetration Testing (PT) for Web Application & Mobile Application Which Will Be Treated As Rate Contract For Carrying Out Security Audit Through Cert-In Empaneled Information Security Organisations.

1. Introduction & Background

A secure Web portal creates a single doorway to online services to the citizens. This doorway generates new opportunities to strengthen relationships and increase the value of services delivered to citizens, and employees. To take advantage of these opportunities, it is necessary to mitigate the risk of sharing information, accepting commitments and delivering services over the public internet. A secure web portal mitigates risk of unauthorized access to resources, has an auditable trail to support transactions, particularly those with high sensitivity or high value, protects important information from the moment it is entered by the user and as it continuous through backend applications and workflow processes, strengthens on-line relationships enabling more and more applications and services to be integrated with and accessed via the high-value web portal. Also, submission of data on a web portal to its final destination in multiple back-end applications, information needs to be protected from unauthorized access or use.

2. Objective

The objective of this proposal is to conduct the Audit to discover any vulnerabilities / weaknesses / attacks in the website(s), web application(s) and Mobile Application, which are managed & undertaken /in the process by WTL. The Audit should be done by using Industry Standards and as per the Open Web Application Security Project (OWASP) methodology.

The main objectives for conducting this Web Application, website & Mobile Application security audit and Vulnerability Assessment / Penetration Testing is to:

1. Identify the security vulnerabilities, which may be discovered in the Web application / website and Web Application / website application security audit including cross-site scripting, Broken ACLs/Weak session management, Buffer Overflows, Forceful browsing, CGI-BIN manipulation, Form / hidden field manipulation, Command injection, Insecure use of cryptography, Cookie posing, SQL injection, Server miss-configuration, Well-known platform vulnerabilities, Errors triggering sensitive information leak etc. On the Web Application / websites;
2. Requirements and analysis performed to increase overall security posture;
3. Identification and prioritization of various risks to the websites;
4. Gain a better understanding of potential website its applications and vulnerabilities;
5. Determine if the current Web Application / websites of WTL are secure and evaluate the security.
6. Identify remedial solutions and recommendations for making the web applications secure.
7. Rectify / fix identified potential vulnerabilities, and web application vulnerabilities thereby enhancing the overall security.

3. Scope of Audit

- Web Application Security testing of Static Applications
- Web Application Security testing of Dynamic Applications
- Mobile Application Security Audit
- Vulnerability Assessment of identified WBSDC servers (both Physical & Virtual Machine)
- Penetration Test of identified WBSDC servers (both Physical & Virtual Machine)
- Closure verifications of the findings from the tests, maximum 3 iterations

WEBEL TECHNOLOGY LIMITED

4. Scope of Work

Bidder would be expected to perform the following tasks for Website and the web application security to analyze and review the website / application security. The auditors will have to carry out an assessment of the vulnerabilities, threat and risks that exist in website through Internet Vulnerability Assessment and Penetration Testing. This will include identifying remedial solutions and recommendations for implementation of the same to mitigate all identified risks, with the objective of enhancing the security of the website. The bidder will also be expected to propose a risk mitigation strategy as well as give specific recommendations to tackle the residual risks emerging out of identified vulnerabilities assessment. The website and Web application should be audited as per the Industry Standards and also as per the OWASP (Open Web Application Security Project) model. The auditor is expected to submit the final audit report after the remedies / recommendations are implemented. The final report will certify the particular website / web application as "Certified for Security". All the website security audit reports should contain the details as mentioned at the Audit report.

The scope of the proposed audit tasks is given below. The audit firm / company will be required to prepare the checklist / reports.

Task 1: Web Application/Mobile Application Security Audit / Assessment

Check various web attacks and web applications for web applications for web attacks. The various check / attacks / Vulnerabilities should cover the following or any type of attacks, which are vulnerable to the website / web application.

- Vulnerabilities to SQL Injections.
- CRLF injections
- Directory Traversal
- Authentication hacking / attacks
- Password strength on authentication pages
- Scan Java Script for security vulnerabilities
- File inclusion attacks
- Exploitable hacking vulnerable
- Web server information security
- Cross site scripting
- PHP remote script vulnerability
- HTTP Injection
- Phishing a website
- Buffer Overflows, Invalid inputs, insecure storage etc.
- Other any attacks, which are vulnerability to the website and web applications.
- *The Top 10 Web application vulnerabilities, which are given below, should also checked from the given websites:*

A1 – Cross Site Scripting (XSS)	XSS flaws occur whenever an application takes user supplied data and sends it to a web browser without first validating or encoding that content. XSS allows attacks to execute script in the victim's browser which can hijacks user sessions, deface web sites, possibly introduce worms, etc.
A2 – Injection Flaws	Injection flaws, particularly SQL injection, are common in web applications. Injection occurs when user-supplied data is sent to an interpreter as part of a command or query. The attacker's hostile data tricks the interpreter into executing unintended commands or changing data.
A3 – Malicious File Execution	Code vulnerable to remote file inclusion (RFI) allows attackers to

WEBEL TECHNOLOGY LIMITED

	include hostile code and data, resulting in devastating attacks, such as total server compromise. Malicious file execution attacks affect PHP, XML and any framework, which accepts filename or file from users.
A4 – Insecure Direct Object Reference	A direct object reference occurs when a developer exposes a reference to an internal implementation object, such as a file, directory, database record, or key as a URL or form parameter. Attackers can manipulate those references to access other objects without authorization.
A5 – Cross Site Request Forgery (CSRF)	A CSRF attack forces a logged- on victim's browser to send a pre-authenticated request to a vulnerable web application, which then forces the victim's browser to perform a hostile action to the benefit of the attacker. CSRF can be powerful as the web application that it attacks.
A6 – Information Leakage and Improper Error Handling	Application can unintentionally leak information about their configuration, internal working, or violate privacy through a variety of application problems. Attackers use this weakness to steal sensitive data or conduct more serious attack.
A7 – Broken Authentication	Account credentials and session tokens are often not protected. Attackers compromise passwords, keys or authentication tokens to assume other users' identities.
A8 – Insecure Cryptographic Storage	Web application rarely use cryptographic functions properly to protect data and credentials. Attackers use weakly protected data to conduct identity theft and other crimes, such as credit card fraud.
A9 – Insecure Communication	Applications frequently fail to encrypt network traffic when it is necessary to protect sensitive communication.
A10 – Failure to Restrict URL Access	Frequently an application only protects sensitive functionality by preventing the display of links or URLs to unauthorised users. Attackers can use this weakness to access and perform unauthorized operations by accessing those URLs directly.

Task 2: RE-Audit based on the recommendation Report from Task 1

The vendor will be responsible to provide a detailed recommendations report for the vulnerabilities observed from Task 1

Task 3: Re, Re-Audit, if required based on the recommendations Report from Task 2

If vulnerabilities are observed from the re-audit, the vendor has to provide a detailed recommendations report on the vulnerabilities observed or found from Re-audit / Task2. WTL expects that all vulnerabilities will be removed at the Task 3 stage. The audit firm / company has to submit a summary compliance report at end of each task and the final report should certify that the website/ web applications (should mention the name of website and/or web application) is "*certified for security.*"

5. Deliverables and Audit Reports

WEBEL TECHNOLOGY LIMITED

- (a) The successful bidder will be required to submit the following documents after the audit for each website, as mentioned below and the audit firm must also submit suggestions / recommendations and other detailed steps for enhancing the website security
- (i) A detail report will be submitted with security status and discovered vulnerabilities, weaknesses and mis-configurations with associated risk levels and recommended actions for risk mitigations.
 - (ii) Summary and detailed reports on security risk, vulnerabilities and audit with the necessary countermeasures and recommended corrective actions as recommended above need to be submitted in duplicate to the WTL. Also, the same copy should be submitted to the concerned department.
 - (iii) All deliverables shall be in English language and side A4 size format.
 - (iv) The vendor will be required to submit the deliverables as per agreed implementation Plan
 - The deliverables (like *Summary compliance report, Check list, Audit Report, Executive Summary and Final compliance report after all observations*) for each task to be submitted by the Auditors for this assignment as mentioned in the Task1, Task2 and Taks3.

(b) Timeframe of the deliverables

- The selected successful bidder will be required to start the project within 15 days from the date of placing the order for the audit.
- The entire audit must be completed within 30 days from the placing of order.
- All the draft reports of the agreed deliverables should be submitted by the firm/company within 7 days of the commencement of the audit.
- The successful bidder should submit the final reports of the deliverables within 20 days of the commencement of the audit or within 7 days of receiving feedback from the concerned department on draft reports.
- The audit, as mentioned above, has to be completed in time. It is expected that, if required, the successful bidder may deploy multiple teams to complete the audit projects within given time frame.

(c) Audit Report

The Website security audit report is a key audit output and must contain the following:

1. Identification of auditee (Address & contact information)
2. Dates and Location(s) of audit
3. Terms of reference (as agreed between the auditee and auditor), including the standard for Audit, if any
4. Audit plan
5. Explicit reference to key auditee organization documents (by date or version) including policy and procedure documents
6. Additional mandatory or voluntary standards or regulations applicable to the auditee
7. Standards followed
8. Summary of audit findings including identification tests, tools used and results of tests performed (like vulnerability assessment, application security assessment, password cracking and etc.)
 - a. Tools used
 - b. List of vulnerabilities identified.
 - c. Description of vulnerability
 - d. Risk rating or severity of vulnerability
 - e. Test cases used for assessing the vulnerabilities
 - f. Illustration if the test cases to provide the vulnerability
 - g. Applicable screen dumps
9. Analysis of vulnerabilities and issues of concern
10. Recommendations for action

WEBEL TECHNOLOGY LIMITED

11. Personnel involved in the audit, including identification of any trainees

The auditor may further provide any other required information as per the approach adopted by them and which they feel is relevant to the audit process.

6. Expectations of Auditee Organization From The Auditor

Following are the expectations of auditee from the auditor:

1. Verification of possible vulnerable services will be done only with explicit written permission from the auditee.
2. The auditee will refrain from security testing of obviously highly insecure and unstable systems, locations, and processes until the security has been put in place.
3. With or without a Non-Disclosure Agreement Contract, the security auditor will be ethically bound to confidentiality, non-disclosure of customer information, and security testing results.
4. Auditor should have clarity in explaining the limits and dangers of the security test.
5. In the case of remote testing, the origin of the testers by telephone numbers and/or IP addresses will be made known.
6. Seeking specific permissions for tests involving survivability failures, denial of service, process testing, or social engineering will be taken.
7. The scope should be clearly defined contractually before verifying vulnerable services.
8. The scope should clearly explain the limits of the security test.
9. The test plan should include both calendar time and man-hours.
10. The test plan should include hours of testing.
11. The security auditors are required to know their tools, where the tools came from, how the tools work, and have them tested in a restricted test area before using the tools on the customer organization.
12. The exploitation of Denial of Service tests is done only with explicit permission.
13. High risk vulnerabilities such as discovered breaches, vulnerabilities with known, high exploitation rates, vulnerabilities which are exploitable for full, unmonitored or untraceable access, or which may convey immediate risk, discovered during testing are to be reported immediately to WTL with a practical solution as soon as they are found.
14. The Auditor is required to notify the auditee whenever the auditor changes the auditing plan, changes the source test venue, has high risk findings, previous to running new, high risk or high traffic tests, and if any testing problems have occurred. Additionally, WTL is to be notified with progress updates at reasonable intervals.
15. Reports should state clearly all states of security found and not only failed security measures.
16. Reports will use only qualitative metrics for gauging risks based on industry-accepted methods. These metrics are based on a mathematical formula and not on feelings of the auditor.
17. The Auditor is required to notify WTL when the report is being sent as to expect its arrival and to confirm receipt of delivery.
18. All communication channels for delivery of report are end to end

7. Completion of Web Application Security Audit, Mobile Application Security Audit & VA/PT Activity

1. The Vulnerability Assessment should be carried out at on-site for the devices/servers, etc and Penetration Testing should be carried out from the selected bidder's site. The VA/PT may also be carried out after obtaining written permission from WTL.
2. The selected bidder should complete the VA/PT activity and submit the reports within two weeks from the date of acceptance of Purchase Order.

8. Deliverables

The deliverables for Web Application Security, Mobile Application Security Audit & VA/PT activity are as follows: -

WEBEL TECHNOLOGY LIMITED

1. Execution of Vulnerability Assessment and Penetration Testing for the identified network devices, security devices, servers, Web Application Security Audit for Web applications/ websites, etc as per the Scope mentioned in this RFP and Analysis of the findings and guidance for resolution of the same
- a. Web Application Security Audit &VA/PT Report (Type - Documentation)
The Web Application Security Audit &VA/PT Report should contain the following: -
 1. Identification of auditee (Address & contact information)
 2. Dates and Locations of VAPT
 3. Terms of reference
 4. Standards followed
 5. Summary of audit findings including identification tests, tools used and results of tests performed (like vulnerability assessment, penetration testing, application security assessment, website assessment, etc.)
 - a. Tools used and methodology employed
 - b. Positive security aspects identified
 - c. List of vulnerabilities identified
 - d. Description of vulnerability
 - e. Risk rating or severity of vulnerability
 - f. Category of Risk: Very High / High / Medium / Low
 - g. Test cases used for assessing the vulnerabilities
 - h. Illustration of the test cases
 - i. Applicable screenshots.
 6. Analysis of vulnerabilities, and issues of concern
 7. Recommendations for corrective action
 8. Personnel involved in the audit

The bidder may further provide any other required information as per the approach adopted by them and which they feel is relevant to the audit process. All the gaps, deficiencies, vulnerabilities observed shall be thoroughly discussed with WTL before finalization of the report.

The Web Application Security, Mobile Application Security Audit & VA/PT Report should comprise the following sub reports: -

- a. Web Application Security, Mobile Application Security Audit & VA/PT Report - Executive Summary:
-The vendor should submit a report to summarize the Scope, Approach, Findings and recommendations, in a manner suitable for WTL authority.
- b. Web Application Security, Mobile Application Security Audit & VA/PT Report - Core Findings along with Risk Analysts: The vendor should submit a report bringing out the core findings of the VA/PT conducted for network devices, security devices, servers and websites.
- c. Web Application Security, Mobile Application Security Audit & VA/PT Report VA/PT Report - Detailed Findings/Checklists: The detailed findings of the VA/PT would be brought out in this report which will cover in details all aspects viz. identification of vulnerabilities/threats in the systems (specific to equipment's/resources -indicating name and IP address of the equipment with Office and Department name), identifications of threat sources, identification of Risk, Identification of inherent weaknesses, Servers/Resources affected with IP Addresses etc. Report should classify the observation into Critical/Non-Critical category and asses the category of Risk implication as VE. RY HIGH/HIGH/MEDIUM/LOW RISK based on the impact. The various checklist formats, designed and used for conducting the VA/PT activity as per the scope, should also be included in the report separately for Servers (different for different OS), application, Network equipment, security equipment et, so that they provide minimum domain wise baseline security standard/practices to achieve a reasonably secure IT environment for technologies deployed. The Reports should be substantiated with the help of snap shots/evidences /documents etc. from where the observations were made.

Web Application Security Audit, Mobile Application Security Audit and VA/PT Report - In Depth Analysts of findings /Corrective Measures

WEBEL TECHNOLOGY LIMITED

Recommendations along with Risk Analysts: - The findings of the entire VA/PT Process should be critically analyzed and controls should be suggested as corrective /preventive measures for strengthening / safe guarding the IT assets of the WBSDC against existing and future threats in the short /long term. Report should contain suggestions /recommendation for improvement in the systems wherever required. If recommendations for Risk Mitigation /Removal could not be implemented as suggested, alternate solutions to be provided. Also, if the formal procedures are not in place for any activity, evaluate the process & the associated risks and give recommendations for improvement as per the best practices.

Web Application Security Audit, Mobile Application Security Audit and VA/PT Report -Suggestion for Industry Best Practices: The vendor has to provide hardening parameters for OS, Websites, Web-based Applications, Databases, Servers, Network and Security Devices as per the Industry best practices standard.

WBSDC will provide necessary VPN connection through respective Department / Directorate for conducting Audit.

Scope of Work & Responsibility of Department / Directorate and other organization

Respective Application owner of different Department / Directorate/ other organization of GoWB will provide necessary coordination between Application Development team and SI and also provide necessary VPN and other related service from WBSDC authority through SDC hosting portal.

Scope of Work & Responsibility of WBSDC

WBSDC will provide necessary VPN connection through after approval from the respective Department / Directorate for conducting Audit.

Following infrastructure and other related services deployed at WBSDC and to be installed at proposed DC cum DR site at Purulia

“**Government**” / “**Gov. of W. Bengal**” means the Government of West Bengal.

“**GoI**” shall stand for the Government of India.

“**GoWB**” means Government of West Bengal

“**Installation**” means that the laying down and installation of the Solution in accordance with this Contract.

“**Personnel**” means persons hired by the Bidder as employees and assigned to the performance of the Infrastructure Solution or any part thereof.\

“**Similar Nature of Work**” means job related to Application Security Audit and Vulnerable Assessment / Penetration Testing viz.

“**Project**” means empanelment of Application Security Audit for web application and Vulnerable Assessment / Penetration Testing of servers under West Bengal State Data Centre.

“**Services**” means the work to be performed by the Bidder pursuant to this Contract, as described in the detailed Scope of Work.

“**Interest rate**” means “364 days Government of India (GoI) Treasury Bills” rate.

WEBEL TECHNOLOGY LIMITED

"**Law**" shall mean any Act, notification, bye law, rules and regulations, directive, ordinance, order or instruction having the force of law enacted or issued by the Central Government and/or the Government of West Bengal or any other Government or regulatory authority or political subdivision of government agency.

"**LOI**" means issuing of Letter of Intent shall constitute the intention of the WTL to place the Purchase Order with the successful bidder.

"**Operator**" means the company providing the services under Agreement.

"**Requirements**" shall mean and include schedules, details, description, statement of technical data, performance characteristics, standards (Indian as well as International) as applicable and specified in the Contract.

"**IT&E**" mean Department of Information Technology & Electronics

"**SDC**" mean State Data Center

"**Termination Notice**" means the written notice of termination of the Agreement issued by WTL.

"**WTL**" means Webel Technology Limited a Govt. of W. Bengal undertaking.

2. PRE BID MEETING

Pre Bid Meeting will be held on 19.05.2023 at 12.00 hrs. (**On-Line Meeting**). Bidder can send their queries as per format (Section - K) to Manager (Purchase) (purchase@wtl.co.in) Only the queries received within the stipulated date prior to the Pre Bid Meeting will be answered. Interest bidders are requested to send mail to (purchase@wtl.co.in) for participation of online pre-bid meeting. Based on request WTL will share meeting id / links for meeting. If there is any change in date and time then will inform.

3. COST OF BIDDING

The bidder shall bear all costs associated with the preparation and submission of the bid and WTL will no case be responsible for those costs regardless of the conduct or outcome of the bidding process.

4. BID DOCUMENT

Bidder is expected to examine all instructions, forms, terms and requirement in the bid document. The invitation to bid together with all its attachment thereto shall be considered to be read, understood and accepted by the bidder unless deviations are specifically stated in the seriatim by the bidder. Failure to furnish all information required by the bid document or a bid not substantially responsive to the bid document in every respect may result of the bid.

5. AMENDMENT OF BID DOCUMENT

At any time prior to the deadline for submission of proposals, WTL reserves the right to add/modify/delete any portion of this document by issuance of an Corrigendum, which would be published on the website and will also be made available to the all the Bidder who have been issued the tender document. The Corrigendum shall be binding on all bidders and will form part of the bid documents.

6. MODIFICATION AND WITHDRAWAL OF BID

As per the bidding process available in the tender.

7. LANGUAGE OF BID & CORRESPONDENCE

The proposal will be prepared by the Bidder in English language only. All the documents relating to the proposal (including brochures) supplied by the firm should also be in English, and the correspondence between the Bidder & WTL will be in English language only. The correspondence by fax/E-mail must be subsequently confirmed by a duly signed formal copy.

8. EARNEST MONEY DEPOSIT (EMD) / TENDER FEE

The bidder shall furnish Online Receipt against payment of Tender Fees and Earnest Money Deposit.

9. REFUND OF EMD / BID SECURITY

EMD / BID SECURITY will be refunded to the unsuccessful bidders without interest by following guidelines of circular 3975-F(Y) dated 28/07/2016 on final selection of Successful Bidders.

10. FORFEITURE OF EMD

EMD made by Bidder may be forfeited under the following conditions:

WEBEL TECHNOLOGY LIMITED

If Bidder withdraws the proposal before the expiry of validity period.

During the evaluation process, if a Bidder indulges in any such activity as would jeopardize the process, the decision of WTL regarding forfeiture of EMD shall be final and shall not be called upon question under any circumstances.

If Bidder violates any of the provisions of the terms and conditions of the proposal.

In the case of a successful Bidder, if Bidder fails to:

- a) Accept the work order along with the terms and conditions.
- b) Furnish performance security.
- c) Violates any of the work conditions of this proposal or indulges in any such activities as would jeopardize the work.
- d) Submitting false/misleading information/declaration/documents/proof/etc.
