CCTV Footage can help in Crime investigation and Prevention

The implementation of a CCTV surveillance system is essential for the centralized procurement centers of the food and supplies department for several reasons:

WEBEL TECHNOLOGY LIMITED

Plot – 5, Block – BP, Sector – V,

Salt Lake, Kolkata – 700091.

- ❖ **Ensuring food safety and quality:** The procurement centers are responsible for handling and storing food items, making it crucial to maintain the highest standards of food safety and quality. CCTV cameras can be used to monitor the handling and storage of food items, and the footage can be used to identify any instances of contamination or mishandling.
- ❖ **Improving operational efficiency:** The installation of CCTV cameras can help improve the operational efficiency of the procurement centers by monitoring the movement of goods, identifying any inefficiencies or bottlenecks in the process, and optimizing the process accordingly.
- ❖ **Enhancing security:** The procurement centers are critical infrastructure for the food and supply department, and their security is of utmost importance. CCTV cameras can be used to monitor access to the premises and identify any unauthorized individuals or activities.
- ❖ **Increasing transparency:** The installation of CCTV cameras can increase transparency in the procurement process by providing an objective record of activities. This can help build trust and confidence in the process among stakeholders.
- ❖ The footage can be utilized to determine the entry and exit points from the scene of the crime.
- ❖ The concern authority can use the footage to verify the accuracy of the statements of both the suspects and the witnesses of a crime.
- ❖ Network Based Surveillance system is efficient to provide live and storage footage through broadband connectivity, as DM, SDO and responsible F&S officers can often monitor the activities of individual areas from their office / F&S Department headquarters rather than visit Central Procurement Centers.

Overall, the implementation of a CCTV surveillance system can improve the overall management and operations of the centralized procurement centers of the food and supplies department, ensuring food safety, quality, and efficiency while enhancing security and transparency.

Some benefits of using CCTV video during a crime investigation:

- The use of the footage as evidence of an offense or crime could result in a guilty plea of the suspects, reducing costs by avoiding legal issue.
- The videos can be used to prove or disprove allegations against a person.
- The footage could be used in the investigations of a missing individual or person.
- The videos can be used as a source of material backup for witness testimony.
