SCOPE OF WORK & RESPONSIBILITY

INTRODUCTION

Online Tender documents are invited from prospective solution providers for development, Installation and Commissioning of an Enterprise GIS Web and Mobile solution

Reputed System Integrators having sufficient experience and credentials for successful completion of “**Similar Nature**” of work in a Government Department/PSU/Autonomous Body or any reputed organization. Bidder must have adequate Solution Engineers for providing on-site warranty support service within the stipulated time.

OBJECTIVE OF THE PROJECT

The project objective is to build an Enterprise GIS Web and Mobile solution that will help the Labour Department to have a single GIS platform for all details relating to its shops, establishments, offices and other administrative infrastructures.

The scope of work definition and responsibilities stated in this document are indicative. However bidder should include any additional products or services required to achieve the functional objective of the project. The purchaser reserves the right to make changes to stated implementation activity or accept bidder’s recommendations for the same during implementation keeping within domain of the stated project objectives.

The Proposed solution will have the following data:

1. Information and location of approx. 8 Lakh Establishments
2. Information and location of Govt. Offices with respect to the Govt. department
3. Information and location of Auditoriums and Community Centres where department can arrange events.
4. Information of Government accommodations.
5. Information of Land owned by the department
6. Information about linked Yojna Beneficiaries.
7. Attendance information of the field officers collected by attendance mobile application.
8. All departmental court case monitoring by web and mobile application.
9. Event data collector mobile application.
10. Integration with department’s inspection mobile application for generation of exact establishment location data.
11. Man-power support for updation of GIS data.

Scope of Work:

◆ MAPPING BY GEO CODING

1. Mapping of approximately 8 lakh establishments, shops and offices under the department by Geo-Coding. The department will provide all the establishment related addresses that will be plotted on GIS map. The Establishments includes:

- Commercial Establishment and Shops
- Factories
- Units of establishments that are using boilers
- Private establishments
- State Labour Institute
- Holiday Homes
- ESI Hospitals
- Labour Courts
- Welder Training Centre
- Nursing College
- Labour welfare facilitation centre

WEBEL TECHNOLOGY LIMITED

Offices includes:

- Labour commiserate offices
 - Employment Exchange offices
 - Boiler offices
 - Factories offices
2. Labour Department owned land.
- The plot of the land which is owned by the department will be digitized and geo referenced from the cadastral map

◆ GPS/DGPS SURVEY OF EVENT GATHERING PLACES AND GOVT ACCOMODATION

- GPS/DGPS survey of Event organizing establishments and Government accommodation centers in Sub Division Head Quarters of approximately 70 towns will be done .
- The establishments to be surveyed in the Sub Divisional Head Quarters are mainly:
 - ◆ Government aided Schools
 - ◆ Auditoriums
 - ◆ Community halls
 - ◆ Government Guest Houses
 - ◆ Circuit Houses, Etc.
- Following attributes of the establishment are to be collected through ground Survey.
 - ◆ Name of the establishment
 - ◆ Location
 - ◆ Capacity
 - ◆ Contact number
 - ◆ Booking criteria
 - ◆ Residential or Non-Residential

◆ Enterprise WebGIS Application:

A Web-Based GIS Application will be developed which will host all the spatial and non-spatial information of the establishments which are under the jurisdiction of Department of Labour, Govt offices, event and gathering venues etc. This system is a centralised system which will be hosted in a cloud server which can be accessed by anybody in the department from any location using defined username and password.

The Application will have the following layers:

Administrative Boundaries

- District Boundary
- Sub Division Boundary
- Block Boundary
- Gram Panchayat Boundary
- Assembly Constituency Boundary
- Parliament Constituency Boundary
- NH & SH Roads
- Rail Network

Departmental Layers

- Commercial Establishment and Shops
- Factories
- Units of establishments that are using boilers
- Private establishments
- State Labour Institute
- Holiday Homes
- ESI Hospitals
- Labour Courts
- Welder Training Centre
- Nursing College
- Labour welfare facilitation centre
- Others as per departmental requirements
- Labour commiserate offices
- Employment Exchange offices
- Boiler offices

WEBEL TECHNOLOGY LIMITED

- Factories offices
- Event Venues
- Auditoriums
 - Government aided Schools
 - Community halls
 - Government Guest Houses
 - Circuit Houses Etc.

Each Layer will have be tagged with various attribute data. The attribute data for mainly for shops and establishments will be (as provided by the department):

- Name of Establishment
 - Address
 - Owner
 - Type of Business
 - Registered under Act
 - No of Workers
 - a. No of Permanent Workers
 - b. No of contractual Workers
 - Risk Factor
- All the data uploaded into the web would be digital and in a SVG format (Scalable Vector Graphics). Unlike an image the size of the data would be minimized which would facilitate loading of data faster. The digital data would make the map interactive and respond to user queries spatially.
 - The Data would be provided on the web in different layers. The users would be given a choice to view its desired information in form of layers. All the layers would have the option of labelling of the respective entity with the details of information within the entity.
 - The software should provide user friendly WEB based GUI (Graphic User Interface), which should be very intuitive and user friendly such that the most important features are available with a few mouse clicks or a few keystrokes.
 - Information on Click:
The user would be able to get information for any layers on the click of a mouse. Along with the statistical data we can also attach other dynamic data to the system and the user can also find within the click of a button the facilities provided in a certain area. The number of respective contact persons along with other contact details can also be displayed.
 - The software would be completely network compliant and would be able to fetch and update data from server via normal networking protocols. The software would be able to connect to any network database and perform database modifications corresponding to the locking protocols as per the RDBMS concepts. The software would be able connect concurrent users to an existing database simultaneously.
 - The web application should have the following features.
 - Zoom in / Zoom out/Pan
 - Pictures of unit on click
 - Generate customized reports
 - Making Layout and Printing
 - Buffering Capabilities
 - Information on Click
 - Spatial and non-spatial Queries
 - Search Facilities
 - Measurement facility
 - **Data Filter Facility**
The solution required a filtration facility to search and access data easily. Official can choose required item from the drop-down list of items related to the district and can find establishments/offices for a specific area. Different search criteria can be added as per requirement.
The filtration feature would comprise of:
 - Easy and quick access of required establishment details
 - Filtration to drill down and fast searching of a particular establishment.
 - Search by establishment under the district
 - Search by different Risk policy
 - Search by type of Business
 - Search by no of workers
 - Search by establishments in a block
 - Detail view of establishment details after filtration

WEBEL TECHNOLOGY LIMITED

- Generation of reports

◆ Land Management Module:

A dedicated module can manage all land related activities and consolidates all land-related data into a single system to maximize its benefits.

- ◆ Store the Land related information like
 - Location
 - Khata No.
 - Total Area
 - Plot type
 - Plot No.
 - Plot Owner Name etc.
- ◆ Digital representation of plot digitized from Mouza Map. If the user clicks on any point or any plot on the map, it will show the basic attribute information for a particular Plot.
- ◆ Air marking the litigated or encroached plot
- ◆ Central repository of land related documents tagged with each plot like:
 - Ownership Deed
 - Porcha
 - Mutation details
 - Map
 - Searching documents

◆ Public Event Management Module:

The department keeps on having requirement of arranging events at different Sub divisional Head Quarters for various purpose. It becomes immensely difficult for the department to arrange the event as they do not have a central repository of the venues with their details where they can arrange events. This results in last minute confusion and anxiety as finding a perfect venue is the primary requirement for arranging an event. If the venue is not found in time it may result in cancellation of the event also.

To avoid this the department is looking forward to build a central repository of all public event gathering venues and accommodation facility which will be highly helpful in decision making and analysis in case of departmental training programs and other requirements.

- ◆ Following Public event gathering spaces will be mapped by Field GPS Survey in 70 Sub divisional Head Quarter Towns.
 - ◆ Auditoriums
 - ◆ Schools
 - ◆ Community Halls
 - ◆ Hostel
 - ◆ Govt. Guest Houses
- ◆ All attributes of the establishment after the survey will be Geo Tagged. On clicking on the establishment, the following attributes will be shown:
 - Name of the establishment
 - Location Address and Lat Long
 - Type
 - Capacity
 - Contact number
 - Booking criteria (if any)
 - Residential or Non-Residential
- ◆ Hosting of the entire survey data in the Enterprise WebGIS
- ◆ Details of the venue will be available on click
- ◆ Selection of venue based on following filter
 - ◆ Location (e.g. Within 5 Km buffer from District Magistrate Office)
 - ◆ Capacity etc.

◆ Attendance Monitoring Module:

Maintaining attendance of Field Officials is very difficult. As they do not attend office regularly they do not fall under a system of attendance which sometimes arises grey areas. Maintaining attendance record is becomes difficult for the HR Department.

To avoid this anomaly, a mobile based Android application is proposed which will help the field official enter their attendance.

WEBEL TECHNOLOGY LIMITED

The attendance mobile application would enable the field officers to:

1. Check-in and Check out of their duties.
2. At regular interval the app will ask if the person is still working or not.
3. The app will require GPS Connection to collect the latitude longitude of the person at the time of checking in and out.
4. The app works in offline mode and will only require internet connectivity to send the data.
5. If the field official checks-in through the application in a location where he is not assigned he will be asked for a reason and at the same time, an alert notification will be sent to his reporting authority.

The Web module will maintain a detailed report of the attendance of an field official, the attendance will be geo tagged and the location of the official can be also seen on the system. The module will have features such as:

1. Monitoring of attendances of field officers of the department and its directorates such as:
 - ◆ Labour Commissionerate
 - ◆ Directorate of Factories
 - ◆ Directorate of Boilers.
2. Whenever a field official starts his daily work, he will open the attendance app and will enter the check in button.
3. As soon as he check in, the Latitude Longitude of the person with time will be captured.
4. For e.g. If the person's location of work is Naihati, then only the attendance hours of his daily duty inside the boundary of Naihati will be recorded.
5. If a field inspector of the Labour Commissionerate logs his attendance through the mobile application in a region he is not assigned an alert notification or SMS will be sent to the Asst. Labour commissioner.
6. Monthly reports based on location and timings can also been generated as reports.
7. The Attendance module can be integrated with the Bio metric attendance system. The module will show whether the employee has checked in through Bio Metric system or Mobile device.
 1. We have already integrated the application with ESSL Security Bio metric attendance System.
 2. For Bio metric system of any other manufacturer the integration has to be checked.

◆ **Samajik Suraksha Yojana beneficiary tagging:**

This module will enable the department or the local SLO (Self Employed Labour Organizer) of a particular ward or a block to identify the amount of SSY beneficiary in a particular ward or GP.

1. Tagging of existing and present SSY beneficiary with details. The details includes:
 - Type of Labour
 - Aadhar Card Number
 - Address
 - ◆ District
 - ◆ Block
 - ◆ GP/ Ward
 - Religion
 - Fathers name
 - Date of Birth
2. Provision for updation of new SSY Beneficiary details is available.
3. SSY Beneficiaries tagging will be done.
4. User can drill down till Ward and GP level for tagged SSY Beneficiary.

◆ **Court Case Management Module:**

The basic objective of this module is to develop an enterprise Solution with a Mobile application, where all the ongoing/closed court cases related to Labour Department will be monitored. The components of the project will be:

A web application: Where all the court case related information will be entered, day-to-day updated and monitored. The application will also be able to assign different cases to lawyers and update status related to case.

A mobile application: Which will provide details of all court cases on the go. The mobile app will also act as a reminder for upcoming hearings.

For do the above-mentioned work the department needs to do the following tasks:

1. Development of customized web-based COURT CASE MONITORING AND MANAGEMENT SYSTEM
2. Development of integrated android mobile app for COURT CASE MONITORING AND MANAGEMENT SYSTEM
3. Training

The Proposed solution will have the following functionality:

1. Initiation of court cases

WEBEL TECHNOLOGY LIMITED

2. Insertion of Court Case Details
3. Petitioner Details with Respondents
4. Type of Case
5. Assigned Advocate Details
6. Document related to Court Case
7. Court Case Status
8. Ongoing/Closed Court Cases
9. Report Generation
10. Lawyer Management
11. Mobile Application for the entire solution

Scope of Work:

The scope of work includes development of:

- Development of customized web-based MIS application "Court Case Monitoring and Management Module"
- Development of integrated android mobile application for the whole solution
- Training of the department officials

Development of customized web-based MIS application "Court Case Monitoring and Management System"

The Web based MIS application will cover the entire hierarchy of the department and will give an end to end solution from initiation of a court case to closing of the same for a particular project and monitor the court case progress and generate reports.

The components of the web application comprise of the following:

- User Login
- ✓ Court Case Initiation Module
- ✓ View/Edit/Delete Court Case Module
- ✓ Court Case Status Module
- ✓ Advocate Management Module

- Advocate Login/Registration
- ✓ Court Case Hearing Update Module
- ✓ Document uploading

Court Case Initiation Module:

The proposed module will offer a form-based interface for entering court case related information. The following data can be entered through this input component:

1. Name of Division
2. Court Case Number
3. Case Year
4. Petitioner details for the case
5. Respondents details for the case
6. Brief particulars – Subject and Section of Law
7. Type of case
 - a) SLP in supreme court
 - b) WP (C/S)
 - c) WP (P/L)
 - d) Contempt
 - e) LPA
8. Prayer for court case

WEBEL TECHNOLOGY LIMITED

9. Assigning of Advocate
10. Court where appealed by petitioner
 - a) Supreme Court
 - b) High Court
 - c) NGT
 - i. Principal bench
 - ii. Eastern Zone Kolkata
11. Uploading of document related to court case
12. Remarks

View/Edit/Delete Court Case Module:

View List of Court Cases

The list component will offer an interface to the users to view all the currently pending court-cases. Facilities like sorting and searching on the list items will be supported by the module. A separate list interface will be provided to view the archived court-case records.

Update existing Court Cases

Any court-case related information can be easily modified via the proposed module. The said module will provide a form-based interface for the same. Data can be updated through the update component: Apart from modifying the information in the enterprise archive, the system will allow adding multiple sets of the information via the update component:

Delete existing Court Cases

Once a court case is concluded, it can be removed from the pending court-cases list. The proposed module will have provision to delete a court case. Deleting a court-case record will mark that record as archived in the system database and from that point it will be listed under the "Archived List" instead of the "Pending Court-Cases List".

Court Case Status Module:

Official can check all the existing case status from this module. Case status updated by assigned advocate for individual cases will be readily available in this section

The court cases listed under this module will show

1. Last date of hearing of a particular court case
2. Document related to the court case also available
3. Next date of hearing for a particular court case
4. Remarks added by assigned advocate
5. Court cases can be filtered for quick and easy access
 - a) Filtration by regional office
 - b) Filtration by district
 - c) Filtration by case type
 - d) Filtration by date of hearing

Advocate Management Module:

Basic details of all the Advocate related to court cases will be listed in this module.

The module will consist of different advocate information like;

1. Advocate Name
2. Address
3. Mobile Number
4. Email ID
5. Assigned Court Cases
6. Assigned Court Case Status

Advocate Login:

Assigned advocates can Login to the application by using their Login Credential, provided by JSPCB. New user can register themselves by using the registration option in the application. After logging advocate can see all the assigned court cases to them. They can update individual case status by providing case hearing details, attaching hearing order details, updating next hearing date etc.

WEBEL TECHNOLOGY LIMITED

The form-based interface will help to enter court case related information. The following data can be entered through this input component:

1. Last hearing date and hearing output
2. Scan copy of Last hearing order uploading
3. Next hearing date
4. Closed case details
5. Special remarks related to any case

Development of integrated android mobile application for the whole solution

A mobile application for the entire system would facilitate the management to have access to the details and documents related to all the court cases. It also carry out some regular tasks when they are travelling or not in front of their systems. The main features of the mobile applications are as follows:

1. An official can browse all court cases and can view the status of a particular court case
2. Court case initiation can be done by entering case details like; case number, petitioner and respondents details, subject, case type, advocate assigned for the case etc.
3. An official can get access to all ongoing, pending and closed court cases and detailed view of those cases by using the mobile application.
4. With the mobile application an official can check the case hearing status and upcoming hearing information for a particular case
5. Uploading of court case hearing document and other document related to a particular case can also be done using the mobile application.
6. Assigned advocate can login for court case status update. They can also put their remarks for individual court cases assigned to them.
7. There will be Push Notification and will be given for the following situations
 - a) New court case initiation
 - b) Assigning of court case to an advocate
 - c) Court case status update by assigned advocate
 - d) Pending court cases
 - e) Advance notification to the concerned advocates

◆ Event Recorder Module

The labour Department keeps on arranging events for both internal and external factors. Sometimes the events are for an internal cause like meeting, training program etc. and sometimes its is for external programs like Public awareness event, Training and Skill development programs etc.

The department is in need of a web-based platform where details of these events will be recorded. The system will have a mobile app via which the department will capture the event details with no of attendees and photograph/short video. This data will be geo tagged and thus will be integrated with the department central GIS module.

The Web Application will have the following features:

1. Following details of the event will be stored:
 - District
 - Block
 - GP
 - Event Title
 - Type of Event
 - Date of Event
 - Venue
 - Organized by
 - Objective of the Event
 - No. of Attendees
 - Description
 - Photograph
 - Short Video
 - Latitude and Longitude
 - Any documents attached
2. All Events will be listed in a single page which can be filtered based on location/ type of event etc.
3. The administrator will be able to download report with photograph as and when required.
4. All events will be geo-tagged. So the Web based GIS System will be able to show the location of all the events that the department has undertaken.

The mobile application will consist of:

WEBEL TECHNOLOGY LIMITED

Secured role and rule based login Id and password will be provided with which the officials can login in the mobile app and taking location-based photographs and videos which are directly sent to the server. The mobile application features:

1. User will be able to capture the following data:
 - a) District
 - b) Block
 - c) GP
 - d) Event Title
 - e) Type of Event
 - f) Date of Event
 - g) Venue
 - h) Organized by
 - i) Objective of the Event
 - j) No. of Attendees
 - k) Description
 - l) Photograph
 - m) Short Video
 - n) Latitude and Longitude
 - o) Any documents attached
2. The mobile app will have offline storage capability and it will automatically sync with the server once the internet is available.
3. The mobile app will have option to browse all the stored event data based on the role of user.
4. The system will also have an event calendar where the departmental official can plan and update their event. The department officials will have option to view the events based on role and responsibility
 2. This event record can be done through mobile application from the event location.
 3. Event related documents can be attached through the mobile application.
 4. Management can view event calendar and event details.
 5. User can search and view previous events.
 6. The application can work on offline mode also.

◆ Integration of the System with Departments Inspection Mobile Application:

Currently the Department is using an Inspection App which runs on Tablet for the purpose of Inspection of Shops and Establishments which is developed by NIC.

1. As per information provided by the department, the App collects all the following data as per requirement and guidelines of the labour department and Commissionarate.

- a. Nature of the Industry/ Business
- b. Name of Establishment/ Industry/ Shop
- c. Address
- d. District
- e. Subdivision
- f. Block
- g. GP
- h. Police Station
- i. Pin code
- j. No. of Men Workman
- k. No. of Female Work Man
- l. No of Other Worker engaged
- m. Latitude Longitude of the data collected

The above collected data has to be integrated with the Enterprise GIS.

All Inspection has to be linked with the location of the Establishment in the Enterprise GIS.

Clustering of Inspection has to be done for better viewing on GIS Map

Intelligent GIS Based Thematic Maps will be designed for showing the inspection data collection amount district wise/ block wise.

As the Enterprise GIS will have tentative location of the Establishment based on Geo coding of the available address, the new location will be updated based on the inspection location.
